#### **Course Description**

This course introduces students to pressing disease and health care problems worldwide and examines efforts currently underway to address them. Taking an interdisciplinary approach, the course identifies the main actors, institutions, practices, and forms of knowledge production at work in the 'global health system' today, and explores the environmental, social, political, and economic factors that shape patterns and variations in disease and health across societies. We will scrutinize the value systems that underpin specific paradigms in the policy and science of global health and place present-day developments in historical perspective.

Key course topics include: the social determinants of health; development and the governance of disease; vertical and diagonal health interventions; technological change and public health; human rights and global health jurisprudence; measuring health outcomes and assessing value for patients; and the shifting role of states, civil society, and public-private partnerships in health care delivery.

Throughout the course, students will be encouraged to think critically and creatively about health problems and policies and to envision innovative and effective interventions. We will emphasize the ways in which the field of global health challenges both the social and natural sciences to keep up with changing socio-medical realities, to illuminate both the benefits and unintended consequences of interventions, and to better understand local worlds and the needs, experiences and capacities of people.

THIS IS A LAPTOP-FREE CLASS.

Please turn off all electronic devices before entering the classroom.

#### Requirements/Grading

The success of the course depends on your commitment to complete all required readings and watch assigned films, to critically reflect on these materials, to participate actively in class discussions, and to creatively integrate course insights into your group project and final independent research paper.

#### Grading will be based on:

- Class attendance, participation, and discussion board posts (20%). Students are expected to contribute to group and class discussions and may be called upon to elucidate course materials. Each Wednesday by the time class begins students will also be required to post contributions to the Discussion Board on Blackboard; failure to do so will impact the participation grade. Preceptors will read and provide informal feedback on Blackboard posts, and Professor Biehl will also review them periodically. The first post is due Wednesday 9/18, no post is due 10/23 (midterms), and no post is due the final week of class (12/11).
- Precepts (20%). All students will be required to attend a precept each week and actively
  engage all precept discussions and activities, including debates, thinking exercises, and
  policy memos. This grade will also include small group presentations on specific
  challenges in global health to take place during the final two precept sessions in
  December.
- Midterm take-home exam (25%). Short essay questions will be posted to Blackboard after class on 10/23. Your responses should be uploaded to Blackboard by Friday,
   10/25 at 5:00 PM. Late submissions will be penalized one full letter grade per day.
- A final individual research paper (35%). The final paper is meant to allow you to explore your own global health and health policy interests and to encourage you to assess the potential methodological and analytical contributions of your home discipline. The paper can focus on a specific case within the larger field that you studied for your group presentation in precept. In exploring your case—a particular global health challenge (biology/disease, burden, and policy)—you are expected to critically apply the insights and analytics developed throughout the course. The paper should be 10 to 12 double-spaced pages (please adhere to this limit!) and include an additional one-page abstract emphasizing applications for health policy. A short outline of the paper is due on December 3<sup>th</sup>, and the paper itself is due on Dean's Date, Tuesday, January 14, by 5:00 p.m in 116 Aaron Burr Hall. Late submissions will be penalized one full letter grade per day.

See University's general standards for grading: <a href="http://www.princeton.edu/~odoc/grading">http://www.princeton.edu/~odoc/grading</a> policies.html
